

ONTARIO RETURN TO CYCLING UPDATE V.5 – July 17, 2020

As of 12:01 am on July 17, 2020 [two reopening stages](#) are in effect for the province:

Stage 2 – continues to be guided by the [Progressive Return to Cycling Policy](#) approved July 9, 2020 as posted on our website.

Stage 3 – All aspects of the July 9, 2020 document are in effect with the following amendments

Group Activities

- A. OCA sanctioned Group Activities may be comprised of a maximum of 15 participants (physically distance) including pre, during, and post activity.
 - I. Consideration must be given to overall length of the group when on the road
- B. Clubs/Teams may have multiple Group Activities around the same time (to a **MAXIMUM # of 60 participants over all groups**), however these activities should be spaced out by either time and/or location to avoid congregation pre/post activity and to avoid the potential for overlapping during the activity

Grassroots ITT

- A. The maximum number of participants (including Starters, Timers, Marshalls, Volunteers, etc.) has been increased to 50.
 - I. Clubs/Teams should break a large group into smaller “waves” to avoid large congregating groups at the start and finish points.

We fully recognize that in this update the limits are less than the provincial allowances for Stage 3 however at this point, with limited activities having taken place over the past number of months, we are confident that taking a conservative incremental approach to activity sizes in the near term will still benefit all members looking to participate in club/team sanctioned activities.
