

## 7 Days 2024 - Technical Guide

Our support model is comprised of the following:

- 2 sweep vehicles, each with 2 people in them. One who is trained in advanced first aid and one who can do basic bike maintenance (change a tire, etc.)
- 3 rest stop vehicles, each with 2 people in them.
- 1 cargo/lunch vehicle with 2 people
- 1 van with the Chief Support Officer and a driver that will co-ordinate the other cars and be available to make the critical decisions
- 1 scout car that will drive the next day's route and brief the riders the following morning on any issues they found

For the sweep vehicles, one car will drive up and back on the course while the other trails the last riding group.
